

**CORRECTIONS TO
'ON DIFFERENTIAL GRADED CATEGORIES'**

BERNHARD KELLER

I am very grateful to Gustavo Jasso for pointing out the following mistakes in [1].

1. On line 14 of section 2.3, in the definition of a dg functor, a sign is missing:
It should read
.... such that $(Gf)(\phi_X) = (-1)^{pn}(\phi_Y)(Ff)$ for all $f \in \mathcal{A}^p(X, Y)$
and all $X, Y \in \mathcal{A}$.
2. On the second line after Lemma 3.10, the sentence 'Then the lemma shows that $\mathbf{R}G$ is an equivalence iff E is a quasi-equivalence.' is erroneous. It should read
Then the lemma shows that if E is a quasi-equivalence, then functor $\mathbf{R}G$ is an equivalence.
